| 1 | Life expectancy at birth (years) | Published | 2000 | Europe | High-income | Andorra | Both sexes | 80 | 80.0 | NaN | NaN | NaN |

5. Change the names of multiple columns.

Expected Output:

| | Indicator_id | Publication Status | Year | WHO Region | World Bank income group | Country | Sex | Display Value | Numeric | Low | High | Comments |
|---|----------------------------------|-----------------------|------|---------------|----------------------------|---------|---------------|------------------|---------|-----|------|----------|

| 3194 | Life expectancy at birth (years) | Published | 1990 | Europe | Lower-middle- income | Republic of Moldova | Both sexes | 68 | 68.0 | NaN | NaN | NaN |
| 3197 | Life expectancy at age 60 (years) | Published | 1990 | Europe | Lower-middle- income | Republic of Moldova | Male | 15 | 15.0 | NaN | NaN | NaN . |

7. Arrange multiple column values in ascending order.

Expected Output:

| | Indicator_id | Country | Year | WHO Region | Publication Status |
|---|-----------------------------------|---------|------|------------|--------------------|
| 0 | Life expectancy at birth (years) | Andorra | 1990 | Europe | Published |
| 1 | Life expectancy at birth (years) | Andorra | 2000 | Europe | Published |
| 2 | Life expectancy at age 60 (years) | Andorra | 2012 | Europe | Published |

8. Make **country** as the first column of the dataframe. **Expected Output:**

| | Country | Indicator_id | Publication Status | Year | WHO Region | World Bank Income group | Sex | Display Value | Numeric | Low | High | Comments |
|---|-------------------------|-------------------------------------|-----------------------|------|--------------------------|----------------------------|---------------|------------------|---------|-----|------|----------|

| 4 | United Arab Emirates | Life expectancy at birth (years) | Published | 2012 | Eastern Mediterranean | High-income | Female | 78 | 78.0 | NaN | NaN | NaN |

9. Get the column array using a variable **Expected Output:**

10. Get the subset rows 11, 24, 37 **Expected Output:**

| | Indicator_id | Publication Status | Year | WHO Region | World Bank income group | Country | Sex | Display Value | Numeric | Low | High | Comments |
|----|--------------------------------------|-----------------------|------|--------------------|----------------------------|----------------------|--------|------------------|---------|-----|------|----------|
